

# RUTH DANIELA AGUIRRE

## FULL STACK DEVELOPER & CLOUD AWS

### ABOUT ME

I'm a programming enthusiast with passion for languages and exploring the beauty of human expression. Thus, I combine inspiration and knowledge in my approach to code creation. Additionally, my experience in using agile methodologies such as Scrum and Kanban has strengthened my ability to collaborate effectively in multidisciplinary teams, adapting to changes. I'm eager to contribute my skills in structural analysis, creativity and teamwork to my upcoming projects.

### KEY PROJECTS

#### Move Mate - Your Stress-Free Moving Companion

Engineered a dynamic user interface using React and Tailwind CSS, ensured robust data management with MySQL, and optimized server-side operations with Nest.js. Oversaw version control and collaborative development through Git and GitHub.

#### Touch the DOM

Steered the development of an online music platform, as Scrum Master. Implemented agile methodologies to drive timely and efficient project delivery. Directed design efforts and managed tasks meticulously with Jira, ensuring a successful project outcome.

### WORK EXPERIENCE

#### FemCodersClub Management Application

Directed the development of a responsive application with React, Nest.js, MySQL, and TypeScript in order to deliver a seamless user experience. Coordinated the team's efforts using GitHub for version control, Figma for design, Tailwind for styling, and Jira for task management.

#### Somos F5 - Globant Hackathon

Commanded the development of a collaborative marketplace during the Globant Hackathon. Delivered an innovative product within the hackathon timeframe by leveraging HTML, JavaScript, React, and GitHub.

#### TELUS, Barcelona 2019 – Present

Lead multicultural teams in a professional English-speaking environment. Execute rigorous content moderation and evaluation to ensure compliance with company policies. Mentor and support new team members, facilitating their learning and integration into the team.

### IT EDUCATION

#### Web Development Bootcamp, Factoría F5 (850 hours)

- Designing and developing web applications using Figma, HTML, CSS, Tailwind, Bootstrap, DaisyUI, and Flowbite.
- Creating servers and APIs with NestJS.
- Managing relational databases with MySQL and NoSQL with MongoDB.
- Building interactive and dynamic user interfaces using React.
- Implementation of testing with Vite to ensure code quality.

#### AWS Cloud Bootcamp, Factoría F5 - AWS re/Start In progress (320 hours)

- Bash and Python scripting.
- Linux servers in the cloud (SSH and Remote desktop).
- Cloud databases SQL (Amazon RDS) and NoSQL (Amazon DynamoDB).
- Design and implementation of virtual networks (Regions, VPC, subnets).
- Cloud computing (Amazon EC2, AMIs).
- Serverless (AWS Lambda).
- Cloud metrics and observability.
- Cloud storage (S3, EFS, EBS).
- Cloud security (Firewalls, DDOS, SQL Injection, Security Groups, IAM).
- AWS Precies and Budgets.

### SKILLS

- HTML
- CSS
- JavaScript
- TypeScript
- Python
- React
- GitHub
- Figma
- Jira
- AWS
- MySQL
- MongoDB

### SOFT SKILLS

- Team Work
- Resilence
- Adaptability
- Communication

### LANGUAGE

- English
- Spanish
- Catalan
- French
